

iTRAK[®] SOFTWARE

iTraking Information

iTrak[®] software offers you the ability to track assets, equipment, parts, documents, etc., using a variety of available technologies. Whether the requirement is an active or a passive RFID tracking system, iTrak[®] provides an accurate, real-time update of tagged product movements based on your selected tracking points.

Supported by a central and comprehensive SQL Database, iTrak[®] is an integrated, yet modular approach to Asset Tracking, allowing for better management of your data. Access your information via your network or a web connection.

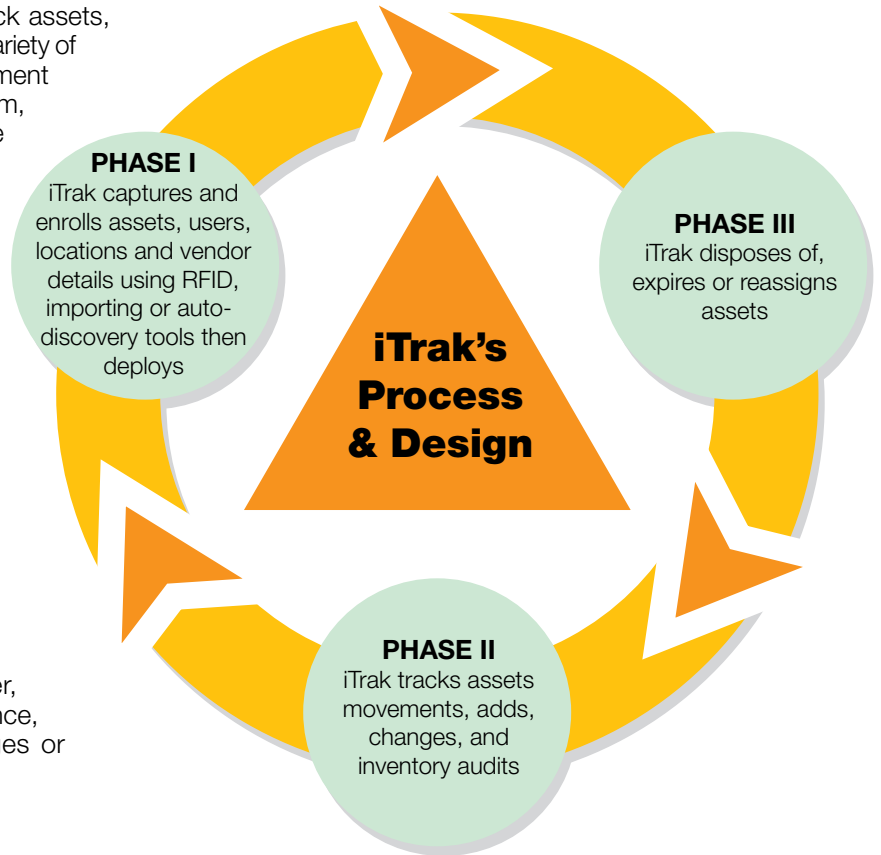

Central Database

iTrak[®] software brings an ability to customize queries and build custom reports. In one central area iTrak[®] stores all the lifecycle details of tagged assets. Reports can be developed to include the following details: Part #, Bin ID, Supplier, PO, Order, Status, warranty and maintenance, physical location status and digital images or documents.

Track Your Assets

iTrak[®] software can track your tagged assets using an active, semi active, or passive RFID solution. Know the date, time and location your asset(s) were moved from location to location. iTrak[®] brings flexibility and expansion capabilities. Since we develop the software in house we can provide custom solutions to meet your specific requirements.

Professional asset reports, alerts, email messages and the ability to search and view data using the web are standard features when using the iTrak[®] software. Complex issues that come with asset management such as contracts, financial details, leases and warranties are handled easily with iTrak[®] software.
